### ACADEMIC PROJECTS

- **User Management System:**  
**Description :**  
Developed a User Management System using .NET Core and MVC to manage user roles, authentication, and access control with a secure and scalable architecture. This project follows CRUD (Create, Read, Update, Delete) operations for user management  
**Technologies Used :**  
ASP.NET Core, C#, Entity Framework, SQL Server, Identity Framework, JWT Authentication.
- **Library Management System:**  
**Description :**  
A web-based application designed to manage library operations efficiently. It includes features like book issuance, returns, user registration, search functionality, and inventory tracking. It simplifies administrative tasks and improves user experience.  
**Technologies Used :**  
ASP.NET Core, C#, Entity Framework, SQL Server, Identity Framework, JWT Authentication.
